Global Technical Support: support@lenolmarine.com

GENERAL

A full range of highest quality marine main and secondary products is offered by LENOL in many ports around the globe in close cooperation with FUCHS LUBRICANTS GERMANY GmbH.

This global Service Guide is a guidebook providing assistance for your marine lubricant requests and deliveries. It is intended to be used in com-

ination with the LENOL Products and Price List. Both the Global Service Guide and the Price List, as well as their updates, form part of your LENOL Sales Contract. The Sales Contract also includes the LENOL Terms and Conditions of Sale, a copy of which can be obtained from your local LENOL representative if required.

Health, Safety and Environmental Protection

LENOL maintains safe and sustainable work practices in strict compliance with Global Health, Safety and Environment Standards. LENOL is committed to act in a socially responsible manner, to protect the environment and preserve natural resources.

To ensure efficient and safe usage of LENOL lubricants and products, users are required to assess and use the products in a safe manner

whilst complying with all applicable laws and regulations. Safety Data Sheets are available for all products, and can be requested from your LENOL representative. They describe the products in terms of safety in use, handling and transportation. For further information about LENOL products or procedures, please do not hesitate to contact your LENOL Representative or visit our website at www.lenolmarine.com

HOW TO USE

This section outlines the LENOL order and delivery process and explains how to use the Global Service Guide in detail.

Order Process

The Global Service Guide will help you in determining the worldwide availability and supply modes for LENOL lubricant products when you have a new order request. The Lubchart has been designed to guide you to select the right product for your vessels. It outlines the recommended LENOL lubricant for all installed engines and machinery on individual vessels, and is available from our LENOL technical service team.

The Contract Port List provides a look-up chart for all ports sorted alphabetically by country, and provides the information for the port of delivery associated with your order, including:

- Product Availability Group
- Supply Mode
- Minimum Quantity per delivery
- Order Notice

Please use the Global Service Guide to check these points for your port of delivery prior to sending your lubricants order to your local LENOL order contact.

The full range of available products at each port will be listed in the Product Availability Groups section. There are three groups: Full, Extended and Core range. A list of LENOL lubricant grades has been assigned to each of these groups and can be reviewed in the following section. All LENOL lubricants are available at ports listed under the Full range group. Ports listed under the Extended and Core range groups offer fewer products. However, the important grades are usually available and we will try to organize the delivery of special products, given adequate notice is provided.

The Supply Mode indicates how individual lubricant grades can be delivered to your vessel at each port. There are three options:

Drum: packed products in Drums (approx.205 Liters) or Pails (approx. 20 Liters)
 Truck: bulk grades, delivered by truck or IBC
 Barge: bulk grades, delivered by barge to the vessel

The standard delivery method for main grades is truck. However, there may be instances where a barge may be required, depending on the port and exact location of the vessel. Additional costs will be provided by the order manager during the order process.

It is important that you make special note of two essential factors when considering your fleet delivery. Firstly, please ensure your requested quantity of LENOL lubricants meets the Minimum Quantity per delivery which is stated for every port and varies for packed and bulk deliveries.

Secondly, to ensure a smooth and efficient delivery, please consider the Notice Time required to successfully complete your delivery. The Notice Time refers to the number of full working days between placing the order and the date of delivery. For example, if you would like us to deliver on Friday (which in this case would be a working day) and the notice time is three days, you would need to send the order on Monday to your local LENOL order contact.

Please bear in mind that there are different holiday and weekend days in different areas of the world. These days do not count as a working day. The Global Service Guide provides you with the usual working days and one standard time zone for a country or region.

Finally, your official order request should include the following information:

- Vessel Name
- Order Number
- Port of Delivery
- Expected Date and Estimated Time of Arrival (ETA)
- Grades and requested quantities/pack size
- Special requirements for the delivery
- Vessel agent details at the port of delivery

To avoid any misinterpretation, please label your request as an order by using the word 'Order' in your headline. Please send your order to email address, or alternatively you can send a fax, or call your local LENOL order representative.

Upon receiving your order, we will advise the most convenient supply mode and provide you with the

delivery details along with our order confirmation. Please accept that from time to time, product availability and supply mode may change due to unforeseeable circumstances. As your trusted partner, we will always strive to provide you with an easy and efficient delivery by establishing the most convenient and favourable port and supply mode.

Delivery Process

All LENOL lubricant products will be supplied in accordance with LENOL Terms and Conditions of Sale.

We will always try to meet your wishes when you have requested a specific delivery time. In order to do this, we will stay in contact with the vessel's agent to determine the best time for delivery.

We must work together to ensure safe delivery of the ordered products. If the delivery is to be made by barge, then you must provide a safe and clear berth alongside the vessel or jetty.

If lubricants are delivered from a bonded stock, or delivered directly to and for seagoing vessels

in international waters, they are normally charged without duty. If this is not the case, any customs duty or tax incurred will be added to your account.

Please make sure to sign the **Delivery Receipt Note** upon delivery of your products. This confirms the receipt of the products.

We hope this Global Service Guide will become your trusted guide in planning and placing your LENOL deliveries for your vessel. In case of any further questions please do not hesitate to contact your local LENOL representative.

Ho Chi Minh City	Core		10 drums	5	
			10 drums	5	
Nha Trang	Core		10 drums	5	
			10 drums	5	
Vung Tau	Core		10 drums	5	
			10 drums	5	

Additional ports

LENOL continuously strives to expand our supply footprint, in order to meet our current and future customers' needs. If you require us to supply your vessel at a port which is not yet listed in the LENOL Global Service Guide, we will do our best to arrange delivery at your preferred location. Please keep in mind that this process takes more time than organising a regular delivery at one of our contract ports.

Therefore, your purchase order should reach your local LENOL order contact earlier than the standard notice time. Any additional costs will be provided by the order manager during the order process.

USED OIL ANALYSIS SERVICE

On-Board Test Kits

On-board test kits bring analysis equipment on board of the vessel and allow for a quick condition check of the lubricants in use. On-board testing is a valuable addition to regular used oil analysis in a laboratory, but cannot replace the much more reliable methods and condition monitoring

options of the laboratory analysis. Further information on On-board test kits can be made available by your local LENOL order representative. To order an on-board test kit, please email your request to orders@lenolmarine.com

Sample Bottle Kits

TRIBOCARE is our experienced laboratory partner covering all used oil analysis and condition monitoring requirements. To order additional sample bottle kits for sending used oil samples to the TRIBOCARE laboratory for analysis, please email your request to orders@lenolmarine.com. Your purchase order should contain as much detail as possible, but must definitely include the following:

- Full delivery details including agent's contact name, telephone number and email address
- Date required
- Number of sample bottle kits required

(one kit contains 12 sample bottles)

- Email address of the person who should receive the report

Please note:

- Allow 5 days lead time from the time an order is placed to delivery on board.
- Please refer to the latest edition of the LENOL Price List for currently applicable prices.

When shipping samples to the laboratory, please identify the laboratory in charge of your samples by the colour code of the area to determine the correct shipping address for your samples:

<p>United Arab Emirates: TRIBOCARE FZC</p>	<p>Singapore: TRIBOCARE Pte. Ltd.</p>	<p>China: TRIBOCARE Shanghai Co., Ltd.</p>
<p>A2-74 SAIF Zone Sharjah, United Arab Emirates Phone: +971 6 5528799 Email: info@tribocare.com</p>	<p>32 Pandan Road Singapore 609279 Phone: +65 6264 2840 Email: Singapore@tribocare.com</p>	<p>Room 202 Block 32, No. 3999 Xiupu Road Pudong District, Shanghai China 201315 Phone: +86 21 68060880 Email: Shanghai@tribocare.com.cn</p>

For more detailed information please refer to the shipping instructions included in the sample bottle kits. Analysis reports will normally be available within 3 working days of receipt of the samples in the laboratory. If for any reason

you do not receive your analysis reports within that time please contact:

info@tribocare.com or support@lenolmarine.com
